

# Keep an Eye Out For...

## Daffodils!

Daffodils are one of the first signs of spring, representing rebirth and new beginnings. They are also often associated with Easter. They come in a variety of colours, including yellow, white and orange.

The Latin name for daffodil is *Narcissus*. This is thought to come from the Greek myth of the hunter who fell in love with his own reflection when looking into a pool of water. He turned into a daffodil when he realised that his love could not be returned.

Walk around the grounds surrounding the House to see these beautiful spring flowers.
